PROFESSIONAL SUMMARY

Senior-minded Full Stack Developer with extensive production experience designing, building, and deploying mission-critical platforms across fintech, micro-lending, e-commerce, education, and media. Proven expertise delivering end-to-end solutions: relational database design, scalable REST/GraphQL APIs (Node.js, NestJS, Laravel), high-performance modern web apps (Next.js 15, TypeScript), native-feel mobile applications (Flutter), and containerized deployments (Docker, Nginx, CI/CD). Passionate about robust architecture, clean code, and building high-impact tech for Rwanda and global remote teams.

WORK EXPERIENCE

Full Stack Developer & Technical Trainer • Fullstack Software Ltd

2024 – Present | Kigali, Rwanda

- Engineered and shipped 14+ client and enterprise production platforms spanning fintech, property management, and e-commerce.
- Architected multi-tier lending engines (LoanMS, InstaCash, CBFinance) handling loan requests, underwriting calculations, amortization schedules, and payment disbursements.
- Built and integrated Rwandan telecom payment gateways (MTN MoMo, Airtel Money API) for automated real-time transaction processing.
- Managed cloud infrastructure, Linux VPS instances, Docker container stacks, Nginx reverse proxies, SSL certificates, and CI/CD pipelines.
- Trained and mentored 50+ students in full-stack web engineering, database architecture, and software engineering best practices.
